General Information

The following information refers to the Adolescent Brain Cognitive Development StudySM (ABCD) Data Release 3.0 available from <https://nda.nih.gov/abcd>. An overview of the ABCD Study[®] is at <https://abcdstudy.org> and detailed descriptions of elements of the study are listed in <https://abcdstudy.org/scientists/protocols>.

This document describes the contents of various instruments available for download. To understand the context of this information, see *Release Notes ABCD README FIRST* and *Release Notes ABCD Imaging Instruments*.

To access detailed information about the instruments administered in this domain, the constructs they are intended to measure and relevant citations for each measure, please see: <https://www.sciencedirect.com/science/article/pii/S1878929317300683>

ABCD Occupation Survey Parent: A questionnaire asking the caregiver about their own and their partner's occupation and job category according the ACS job classifications. This instrument was first collected in the two-year follow-up.

ABCD Youth GISH2: The GISH2 is a youth measure of sexual attraction and behavior. This instrument was first collected in the two-year follow-up.

ABCD Cyber Bully: Assesses whether a youth has experienced or perpetrated cyberbullying, including information about whether it occurred in the past year and the frequency. This instrument was first collected in the two-year follow-up.

ABCD Peer Experiences Questionnaire: Assessment of whether the youth has either experienced overt, relational or reputational victimization from peers or perpetrated overt, relational or reputational aggression towards peers. This instrument was first collected in the two-year follow-up.

Summary Scores not clearly marked in other instruments can be found in the two instruments listed below. Prefixes used in summary score variables are listed at the end of each instrument name.
